List of publications of Petr Vopěnka

Monographs

- [a] The Theory of Semisets (jointly with P. Hájek), Academia Praha, North-Holland Publ. Co., Amsterdam, London, 1972, 332pp.
- [b] Množiny a přirozená čísla (Sets and natural numbers, in Czech) (jointly with J. Blažek, B. Kussová), SPN, Praha, 1977, 220pp.
- [c] Mathematics in the Alternative Set Theory, Teubner Texte, Leipzig, 1979, 120pp.
- [d] Matematika v alternativnoj teorii množestv (Mathematics in the Alternative Set Theory, in Russian), Izd. Mir, Moskva, 1983, 148pp. (Translation of [3] with appendices)
- [e] Úvod do matematiky v alternativnej teórii množin (An introduction to mathematics in the alternative set theory, in Slovak), Alfa, Bratislava, 1989, 443pp.
- [f] Rozpravy s geometrií (Debates with geometry, in Czech), Panorama, Praha, 1989, 519pp.
- [g] Druhé rozpravy s geometrií (Second debates with geometry, in Czech), Práh, Fokus, Praha, 1991, 225pp.
- [h] Geometrizace reálného světa (Třetí rozpravy s geometrií) (The geometrization of real world (Third debates with geometry, in Czech), Matfyzpress, Praha, 1995, 395pp.
- [i] Rozpravy s geometrií: Otevření neeuklidovských geometrických světů (Čtvrté rozpravy s geometrií) (Debates with geometry: Opening of non-euclidean geometric worlds (Fourth debates with geometry, in Czech), Vesmír, Praha, 1995, 161pp.
- [j] Calculus infinitesimalis pars prima (in Czech), Práh, Praha, 1996, 134pp.
- [k] Podivuhodný květ českého baroka (An admirable flower of Czech baroque) (in Czech), Karolinum, Praha, 1998, 296pp.
- [l] Úhelný kámen evropské vzdělanosti a moci. Souborné vydání Rozprav s geometrií (The cornerstone of European education and power. Collected edition of Debates with geometry), Práh, Praha, 2000.
- [m] Meditace o základech vědy, in preparation.

Research papers

- [1] O rozmernosti kompaktnych prostranstv (On the dimension of compact spaces, in Russian), Czechoslovak Math. J. 8(1958) 319–327.

- [2] Zamečanie o rozmernosti metričeskich prostranstv (Remark on the dimension of metric spaces, in Russian), *Czechoslovak Math. J.* 9(1959) 519–522.
- [3] Množiny v rovině, které každá algebraická ireducibilní křivka protne v předepsaném počtu bodů (Sets in a plane which every irreducible algebraic curve meets in a given number of points, in Czech), *Acta Univ. Carol. Math. Phys.* (1960) 45–50.
- [4] On the functional equation $\lambda[f(x)] \cdot \lambda(x) + A(x) \cdot \lambda(x) + B(x) = 0$ (jointly with M. Kuczma), *Ann. Univ. Sci. Budapest, vol. 34, Eötvös Sect. Math.* 1960/61, pp. 123–133.
- [5] Odin metod postroenija nestandardnoj modeli aksiomatičeskoj teorii množestv Bernaysa-Gödel (A method of construction a non-standard model in Bernays-Gödel axiomatic set theory, in Russian), *Dokl. Akad. Nauk SSSR* (1962) 11–12.
- [6] Modeli teorii množestv (Models of set theory, in Russian), *Z. Math. Logik Grundlagen Math.* 8(1962) 281–292.
- [7] Postroenie modelej teorii množestv metodom ultraproizvedenija (Construction of models for set theory by the method of ultraproduct, in Russian), *Z. Math. Logik Grundlagen Math.* 8(1962) 293–304.
- [8] Postroenie modelej teorii množestv metodom spektra (A construction of models of set theory by the method of a spectrum, in Russian), *Z. Math. Logik Grundlagen Math.* 9(1963) 149–160.
- [9] Elementarnye ponjatija v teorii množestv (Elementary concepts in set theory, in Russian), *Z. Math. Logik Grundlagen Math.* 9(1963) 161–167.
- [10] Postroenie nestandardnoj nereguljarnoj modeli teorii množestv (Construction of non-standard non-regular model in set theory, in Russian), *Z. Math. Logik Grundlagen Math.* 9(1963) 229–233.
- [11] Über die gültigkeit des Fundierungssaxioms in speziellen Systemen der Mengentheorie (jointly with P. Hájek), *Z. Math. Logik Grundlagen Math.* 9(1963) 235–241.
- [12] Axiome der Theorie endlicher Mengen, *Časopis Pěst. Mat.* 89 (1964) 312–317.
- [13] Podmodeli modelej teorii množestv (Submodels of models of set theory, in Russian), *Z. Math. Logik Grundlagen Math.* 10(1964) 163–172.
- [14] Construction of a model for Gödel-Bernays set theory for which the class of natural numbers is a set of the model and a proper class in the theory, *The theory of models, Proc. 1963 Internat. Symp. at Berkeley*, ed. by J. W. Addison, L. Henkin, A. Tarski (Eds.), North-Holland, Amsterdam, 1970, pp. 436–437.
- [15] Axiomy numerace, Habilitační práce, MFF, UK, Praha, 1964, 58pp.
- [16] Nezavisimost' kontinuum-gipotezy (The independence of the Continuum Hypothesis, in Russian), *Comment Math. Univ. Carolinae* 5 (Suppl. 1) (1964) 1–48.
- [17] The independence of Continuum Hypothesis, translation of the paper [16], *Amer. Math. Soc. Transl. Ser. 2* 57(2)(1966) 85–112.
- [18] The existence of a PCA-set of cardinal \aleph_1 (jointly with L. Bukovský), *Comment. Math. Univ. Carolinae* 5(1964) 125–128.

- [19] Concerning a proof of $\aleph_{\alpha+1} \leq 2^{\aleph_\alpha}$ without axiom of choice, *Comment. Math. Univ. Carolinae* 6(1965) 111–113.
- [20] A rigid relation exists on any set (jointly with A. Pultr and Z. Hedrlín), *Comment. Math. Univ. Carolinae* 6(1965) 149–155.
- [21] The limits of sheaves and applications on construction of models, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 13(1965) 189–192.
- [22] On ∇ -model of set theory, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 13(1965) 267–272.
- [23] Properties of ∇ -model, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 13(1965) 441–444.
- [24] The first measurable cardinal and the generalized continuum hypothesis, *Comment. Math. Univ. Carolinae* 6(1965) 367–370.
- [25] Permutation submodels of the model ∇ (jointly with P. Hájek), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 13(1965) 611–614.
- [26] Some permutation submodels of the model ∇ (jointly with P. Hájek), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 14(1966) 1–7.
- [27] ∇ -models in which the generalized continuum hypothesis does not hold, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 14(1966) 95–99.
- [28] A new proof of the Gödel's result on non-provability of consistency, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 14(1966) 111–116.
- [29] On strongly measurable cardinals (jointly with K. Hrbáček), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 14(1966) 587–591.
- [30] The limits of sheaves over extremally disconnected compact Hausdorff spaces, *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 15 (1967) 1–4.
- [31] The consistency of some theorems on real numbers (jointly with K. Hrbáček), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 15 (1967) 107–111.
- [32] Concerning the ∇ -models of set theory (jointly with P. Hájek), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 15 (1967) 113–117.
- [33] General theory of ∇ -models, *Comment. Math. Univ. Carolinae* 8(1967) 145–170.
- [34] An undecidable theorem concerning full embeddings into categories of algebras (jointly with Z. Hedrlín), *Comment. Math. Univ. Carolinae* 7(1966) 401–409.
- [35] Generator classes in set theory (jointly with B. Balcar), *Z. Math. Logik Grundlagen Math.* 13(1967) 97–98.
- [36] Decomposition of metric spaces into nowhere dense sets (jointly with P. Štěpánek), *Comment. Math. Univ. Carolinae* 8(1967) 387–404.
- [37] Zerlegung metrischer Räume, *Proc. Internat. Symp. of Extension Theory of Topological Structures*, Berlin, 1967.
- [38] On complete models of the set theory (jointly with B. Balcar), *Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys.* 15(1967) 839–841.
- [39] Ultraproduct, submodels and their extensions, in: B. van Roostselaar (Eds.), *Abstracts of Papers, 3rd Internat. Congr. for Logic*, Amsterdam, 1967, p. 25.
- [40] The notion of effective sets and a new proof of the consistency of the axiom of choice (jointly with B. Balcar, P. Hájek), *J. Symbolic Logic* 33(1968) 495–496.

- [41] The Theory of Semisets, Actes du Congrès International des Mathématiciens, Nice, 1970 vol. 1, Gauthier-Villars, Paris, 1971, pp. 255–260.
- [42] On systems of almost disjoint sets (jointly with B. Balcar), Bull. Acad. Polon. Sci. Sér. Sci. Math. Astronom. Phys. 20(1972) 421–424.
- [43] On the axiom of general collapse (contribution to the theory of semisets V.) (jointly with A. Sochor), Z. Math. Logik Grundlagen Math. 21(1975) 289–302.
- [44] Endomorphic universes and their standard extensions (jointly with A. Sochor), Comment. Math. Univ. Carolinae 20(1979) 605–630.
- [45] The lattice of indiscernibility equivalences, Comment. Math. Univ. Carolinae 20(1979) 631–638.
- [46] Real and imaginary classes in the alternative set theory (jointly with K. Čuda), Comment. Math. Univ. Carolinae 20(1979) 639–653.
- [47] Revealmments (jointly with A. Sochor), Comment. Math. Univ. Carolinae 21(1980) 97–118.
- [48] The axiom of reflection (jointly with A. Sochor), Comment. Math. Univ. Carolinae 22(1981) 87–111.
- [49] Ultrafilters of sets (jointly with A. Sochor), Comment. Math. Univ. Carolinae 22(1981) 689–699.
- [50] Shiftings of the horizon (jointly with A. Sochor), Comment. Math. Univ. Carolinae 24(1983) 127–136.
- [51] Utility theory in the alternative set theory (jointly with K. Trlifajová), Comment. Math. Univ. Carolinae 26(1985) 699–711.
- [52] Metafora o výzkumu multifaktoriálně podmíněných chorob (jointly with D. Pokorný and J. Šimek) in: J. Antoch, J. Jurečková (Eds.), ROBUST 86 - Sborník prací zimní školy JČSMF, pp. 94–99.
- [53] Neviditelné tvary (Invisible shapes, in Czech), in: Zd. Neubauer, J. Fiala (Eds.), Sborník Symposia Implikátní a explikátní řád živé skutečnosti, ČSVTS, Praha, 1986.
- [54] Constructions of classes by tranfinite induction in AST (jointly with A. Sochor), Comment. Math. Univ. Carolinae 30(1989) 155–161.
- [55] What is Alternative Set Theory, General Systems, Philadelphia, Tokyo, Melbourne 20(1)(1991).

Popularization papers, papers on history of mathematics

- [56] Poznámky o současné matematice (Remarks on contemporary mathematics, in Czech), Filosofický Časopis XIX 5(1971) 731–753.
- [57] O prvním Hilbertově problému (Hilbert's first problem, in Czech), Pokroky Mat. Fyz. Astronomie XVI (1971) 117–129.
- [58] O přirozených číslech (On natural numbers, in Czech) (jointly with J. Blažek and B. Kussová), MFŠ 4(1973/74) 570–577.

- [59] Nieskonczonosc, zbiory i możliwość u B. Bolzana (Infinity, sets and possibility in the sense of B. Bolzano, in Polish), *Wiadomości Matematyczne* XXVI (1985) 171–204.
- [60] Eds. Alternative Set Theory All About, in: *Proc. 1st Symposium Mathematics in the alternative set theory*, J. Mlček, M. Benešová, B. Vojtášková. Bratislava, 1989, pp. 28–40.

Lecture notes

- [61] *Analytická geometrie*, SPN, Praha, 1964.
- [62] *Úvod do axiomatické teorie množin* (jointly with J. Blažek, B. Kussová), SPN, Praha, 1972.
- [63] *Úvod do axiomatické teorie množin* (jointly with J. Blažek, B. Kussová), KPÚ, České Budějovice, 1972.
- [64] *Analytická geometrie druhé generace*, Univerzita JEP, Ped. fak., Ústí n/L., 1998.
